

# CS242 Final Project Week2 Test Plan

- 1) Visit <http://127.0.0.1:5000/logout> to make sure you are currently logged out. The logout page will be redirected to login page after logging out successfully.

You can see that the address is <http://127.0.0.1:5000/login> which is correct and the login page showed correctly.

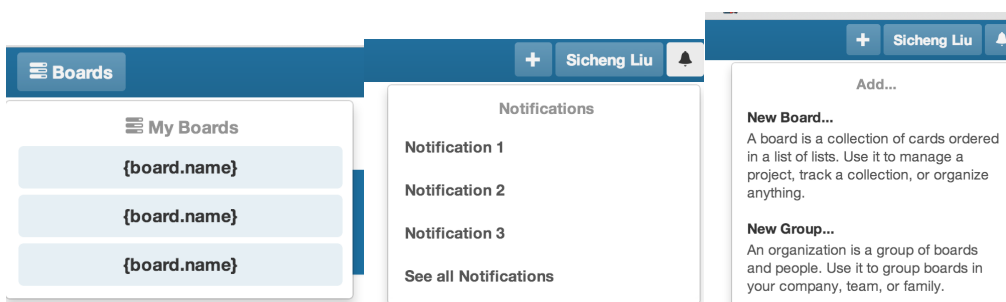

- 2) Visit <http://127.0.0.1:5000/signup>. You can see the signup page is correct.

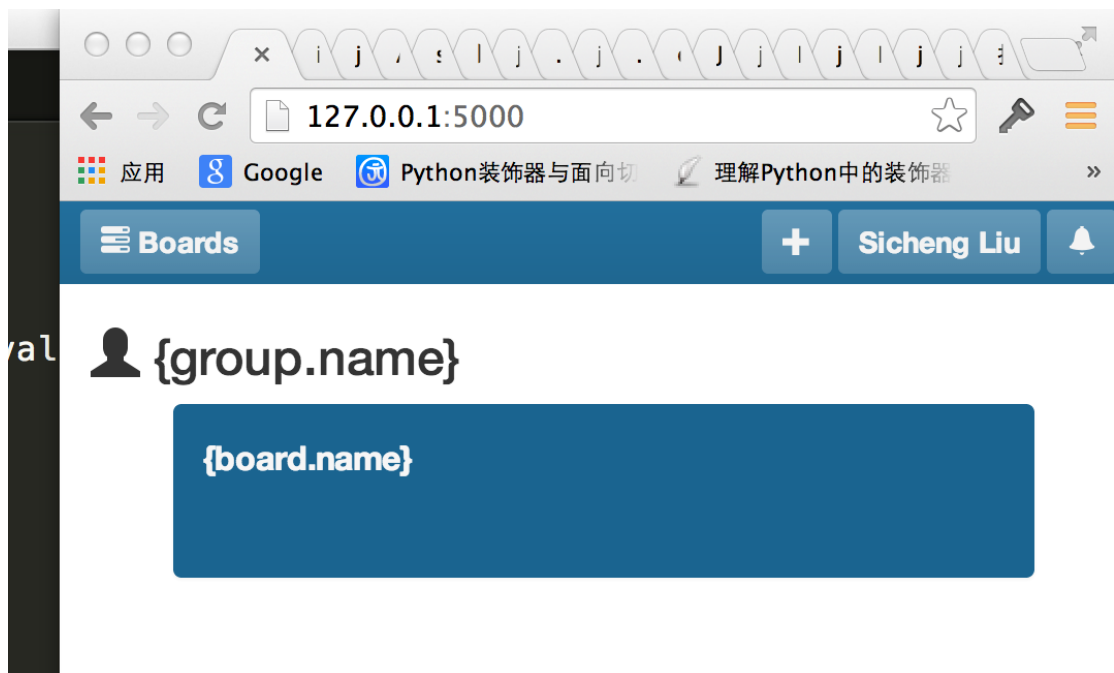

- 3) Now we log in the page. You can see that the index page is shown correctly.

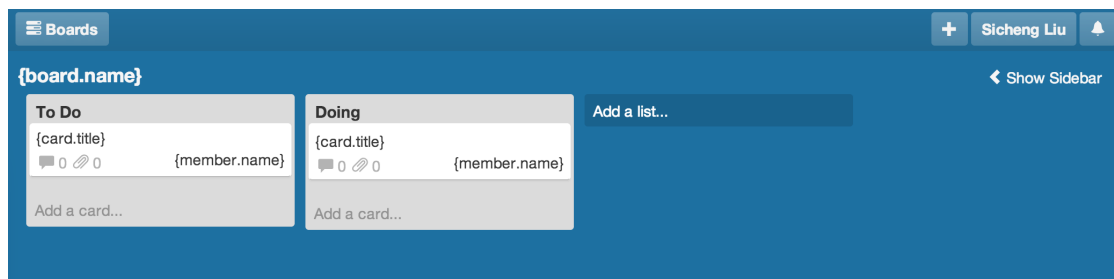

- 4) Click each button on the nav bar on the top. You can see all menus displayed correctly.

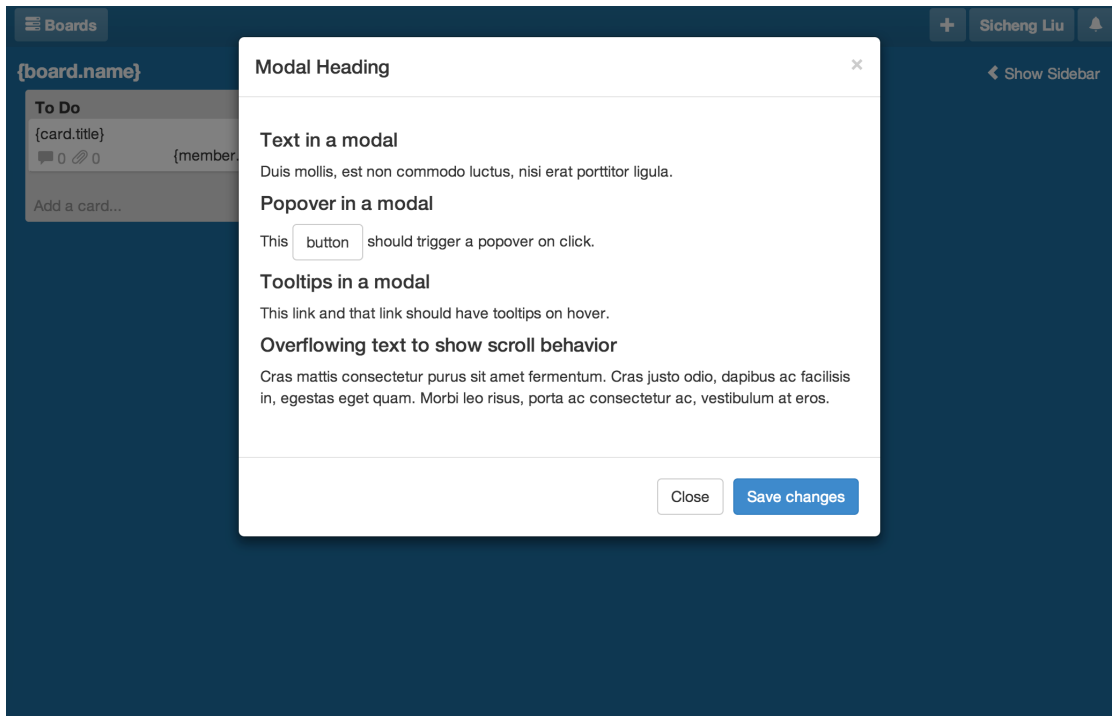

- 5) The resize the window to decrease the width by half. You can see the board size is changed according to the width. This proves the responding layout worked.

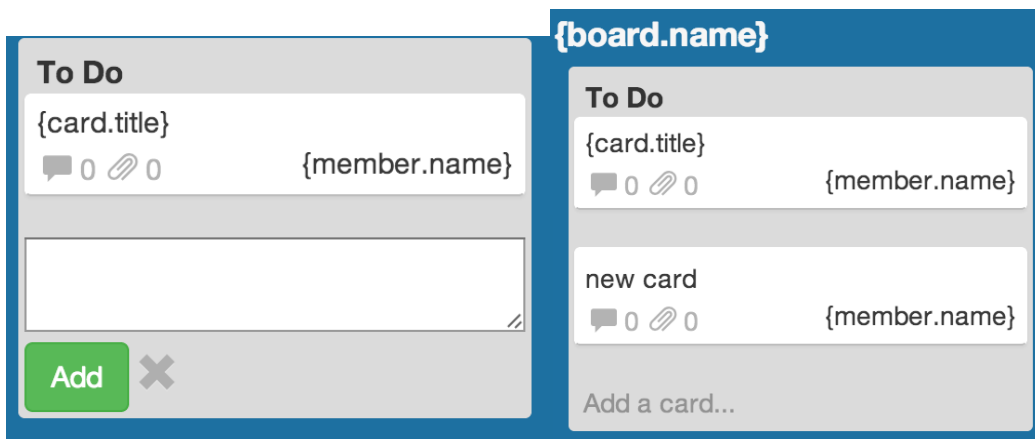

- 6) Now visit <http://127.0.0.1:5000/b/1>. You can see that the board page is rendered correctly.

- 7) Click on the card, the card pop-up is rendered correctly.

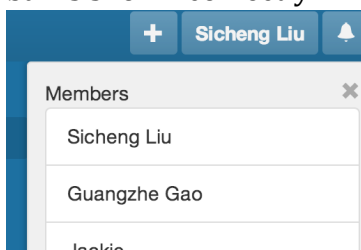

- 8) Test add a card by clicking “add a card”. Then type some title and click add button.

You can see the new card is added and the title is what we entered.

- 9) Now test showbar button by clicking on “show bar” link. You can see the side bar is shown correctly.

- 10) Now change the width of the window, you can see every element is auto-resizing to accommodate the new size.
